1. INTRODUCTION

The 1981 Street Index links address ranges to census enumeration area (EA), census tract (CT), census subdivision (CSD) and federal electoral district (FED) levels of the census geographic hierarchy. Street Indexes generally cover urban centres having 50,000 or more in population and are available for 13 census agglomerations (CA's) and 24 census metropolitan areas (CMA's), of which a portion may only be partially covered.

The data contained in each Street Index consist of Street Data and Geographic Data: the former include street name, type, direction, odd and even address ranges; the latter include census enumeration area, census tract, census division, census subdivision and federal electoral district.

Street data were obtained from area master files (AMF) and include all AMF revisions as of June 3, 1981. Geographic data were obtained from the census geographic master file (CGMF), and include standard geographic classification (SGC) code values in all cases.

1. INTRODUCTION

Le Répertoire des rues de 1981 renferme des tranches d'adresses qui correspondent à des secteurs de dénombrement (SD), à des secteurs de recensement (SR), à des subdivisions de recensement (SDR), et à des circonscriptions électorales fédérales (CEF) qui font partie de la hiérarchie géographique du recensement. En général, les répertoires des rues portent sur les centres urbains de 50,000 habitants ou plus et sont disponibles pour l'ensemble ou une partie des 13 agglomérations de recensement (AR) et des 24 régions métropolitaines de recensement (RMR).

Chaque répertoire des rues comprend des données sur les rues et des données géographiques: les premières consistent à indiquer le nom de rue, son genre, sa direction, et les tranches d'adresses avec nombres pairs et nombres impairs; les deuxièmes sont des secteurs de dénombrement, des secteurs de recensement, des divisions et des subdivisions de recensement et des circonscriptions électorales fédérales.

Les données sur les rues sont tirées du fichier principal de la région (FPR) et comportent toutes les révisions apportées au FPR au 3 juin 1981. Les données géographiques sont tirées du fichier géographique principal du recensement (FGPR) et, dans tous les cas, portent des codes de la Classification géographique type.

2. CONTENT

Each volume covers one specific census metropolitan area or census agglomeration which may consist of one or more cities and towns.

Abbreviations and symbols common to all 38 volumes are indicated on these introduction pages.

This Street Index is referred to as 'the June 3, 1981 ' version.

2. CONTENU

Chaque volume traite d'une région métropolitaine de recensement ou d'une agglomération de recensement particulière pouvant comporter une ou plusieurs villes. Les abréviations et les symboles employés dans les 38 volumes sont indiqués dans l'introduction.

Ce répertoire des rues constitue la version 'du 3 juin 1981'.

4. DEFINITIONS

4. DEFINITIONS

STREET NAME

Street names are based on official municipal documents provided to AMF.

NOTE:

All 'saint streets' have been abbreviated to 'St' or 'Ste', for example:

(St Andrew, Ste Anne).

All numeric streets have been coded using the number rather than the alphabetic spelling, for example:

(First Ave is listed as 1 Av).

All articles have been coded at the end of the street name, for example:

(The Queensway - Queensway the; De 1' Eglise - Eglise de 1).

''street-name unknown'' indicates that '' no known street'' existed in the EA concerned as of the date of publication. To avoid the loss of the EA from the coverage, this name has been used to replace the street name.

NOM DE LA RUE

Les noms des rues sont tirés des documents des municipalités fournis au FPR.

NOTA:

Toutes les rues commençant par ''Saint ou Sainte'' ont été abrégées à St ou Ste, par exemple:

(St-André ou Ste-Anne).

Toutes les rues identifiées par un numéro ont été codées par numéro plutôt qu'alphabétiquement, par exemple:

(Première Ave est indiqué sous 1 Av).

Tous les articles ont été codés à la fin du nom de la rue, par exemple:

(The Queensway - Queensway the, De L' Eglise - Eglise de 1)

''nom de rue inconnu'' indique qu'aucune rue connue n'existait dans le SD en cause à la date de publication. Pour éviter d'exclure le SD du champ d'observation, cette formule est employée pour suppléer au nom de la rue.

GENRE DE RUES

Street type is a two letter code used to identify the different types of addressable streets.

On emploie un code à deux lettres pour identifier les différents genres de rues auxquelles correspondent des adresses de voirie.
